

Introducing the **NEW**

SM100+

Designed for industrial environments where space is restricted, and operators require instant performance and safety to move heavy loads with ease, the versatile SM100+ moves loads of up to 2,464 lbs.

Moves
2,464 lbs

Key Features

Safety

- Features anti-crush button and horn
- Machine stop when controls disengaged
- Hydraulic coupling for load security

Performance

- Dual high-powered motors for equal power distribution
- 180° steering angle for precision movement
- Move loads up to 2,464 lbs

Quality

- Heavy-duty, maintenance-free battery
- Puncture-proof non-marking tires
- Designed for industrial environments and use

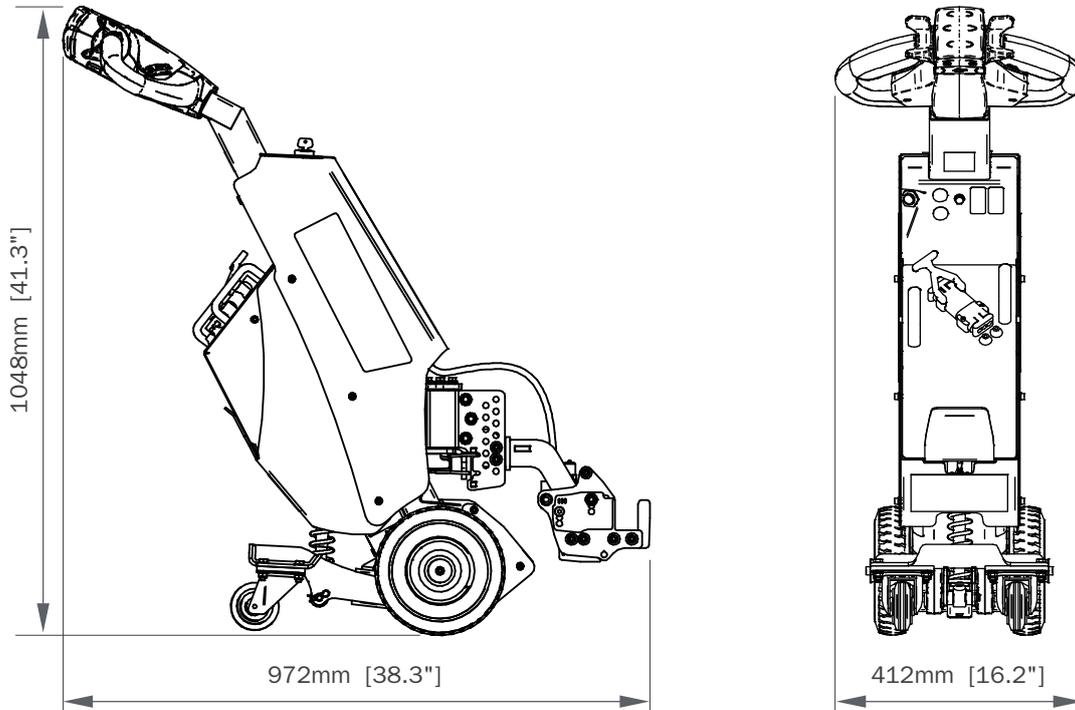

Power

- Interchangeable battery for 24/7 operation with fast charging
- Power display for real-time charge status
- Auto-switch off on full-charge to maximize battery life

Connection

- Features multi-purpose coupling as standard
- Custom coupling available

SM100+ Technical specification

SM100+ Product data

Machine	Maximum Load	2,464 lbs
	Maximum Push Force (N)	1,079
	Maximum Pull Force (N)	1,079
	Connection	Hydraulic
	Maximum Slope	30°
Options	Two Speed Selector Switch	✓
	Flashing Beacon	✓
	Lithium Battery	✓
Coupling	Coupling - Hydraulic variable kit	✓
	Coupling - Adapter straight	✓
	Coupling - Adapter angled	✓
	Custom Coupling Available	✓
