Model P-702-12

Automatic Strapping Machine

Product Features

The P702 is a world class high speed automatic strapping machine. It features several creative designs that make it the most operator friendly machine in its class.

The operator control panel is hinged to allow access from either side of the machine. The Smart LCD display offers enhanced diagnostics and the ability to make adjustments.

The P702-12 features an outside mount dispenser for fast auto strap loading at waist height. The new quick release dispenser flange lock knob makes coil changes faster.

All P702 series machines have a hinged open top plate for easy access to the strapping head. They also feature quick release feed guides for immediate access to the strap feed system with the need for tools.
